TECHNICAL DATA SHEET –Soya Wax/ Eco Soya Wax

PRODUCT NAME : **SOYA WAX / Eco Soya Wax**
APPEARANCE : **White Flakes**

CHEMICAL PROPARTIES	UNIT	SPECIFIC RANGE
APPEARANCE	VISUAL	White
Free Fatty Acid	%	Max. 1
Iodine Value	g/100g	Max. 1
Colour in Gardner Scale		1 – 2
Slip Melting Point	'C	51 - 56
Moisture & Volatile	%	Max 1

Soy candle wax selection-Waxes: Typically, soy candle wax is thought to only be produced by bees. However waxes may be natural or synthetic. They can be categorized in several ways insect wax, vegetable waxes, mineral wax, petroleum wax and synthetic wax. Although waxes are popularly used for candle making, the can also be used as an emulsifying base suited for the preparation of cosmetic & pharmaceutical oil / water creams and lotions.

Soy Candle Wax/ Eco Soya Wax : Our Soya Wax products are produced from sustainable agricultural resources to replace non- renewable petroleum waxes.

Description: Also known as Eco Soya PB, this Pillar blend is made from pure 100% soybeans and carefully selected botanical oils. The addition of the additional oils makes it possible to make pillar candles. !00% pure soy wax is very soft and is not suitable for this type of candle. It is necessary to use a snug fitting votive holder for votives to burn properly. (Even though there are additional oils added, votives are still too soft to burn on their own.)

Benefits of EcoSoya : EcoSoyaâ,,¢ Soy Candle Waxes Are:

- **Made with pure, 100% natural soybeans**
- **Longer, cooler and cleaner burning without soot buildup**
- **Made in India with domestically grown crops**
- **Renewable sustainable resources requiring plant growth**
- **Biodegradable and free from pesticides and herbicides**
- **Produced containing NO Genetically Modified Material**
- **Easy to clean up with soap and hot water eliminating solvents**
- **Manufactured meeting FDA and Kosher standards**
- **Very stable allowing for long shelf life**
- **Not subject to animal testing**
